

CHeKT Camera Firmware Version 78

Document Date: July 8th, 2026

Document Number: 002-0103-00

Improvement Notes

The CHeKT Camera Firmware release includes new features and bug fixes added since Firmware version 68. This firmware update is designed to enhance camera performance and stability across all models, improve AI false positive detection, and improve Profile G SD Card playback performance.

Notes for Dealers

The update process is expected to take 5–10 minutes; during this time, do not interrupt or restart the camera. If completion takes longer than expected, allow up to one hour before attempting a restart or removal of PoE power.

Bug Fixes

Simultaneous Stream Retrieval

- Improved stream retrieval when simultaneous image streams are requested from all cameras
- New image stream defaults configured for CHeKT **CKIPC4MPT-12vDI** to ensure stability for 3 Simultaneous streams

False AI Event Detection

- Improvements to AI Performance and detection including:
 - False alarms due to weather & precipitation
 - Improvements to false alarms due to animals

Aisle Mode

- Improvements to camera performance with Aisle Mode enabled

Profile G Improvements

- Improvements for SD Card playback via Profile G
 - Including response time and seek time
